Application Interface Navigation Guide

Author: Shaik Mohammad Shariff

User Guide

This guide explains how to navigate and use the CreditGuard AI web application interface.

1. Landing Dashboard (Home)

When you open `http://localhost:5000`, you will land on the Home page:

- Project Goal: Review the core classification objectives.
 - Model Summary: Observe the F1-scores of candidate algorithms trained by the pipeline.
 - Theme Toggle: Switch between Dark and Light mode using the theme button in the top right.
-

2. Running a Risk Prediction

To score a credit applicant:

1. Click Predict Risk in the navigation bar.
 2. Fill out the application profile form:
 - Demographics: Gender, Age, Marital Status, and Family counts.
 - Assets & Income: Gross Annual Income, Car/Property ownership indicators.
 - Employment: Occupation class and Years Employed. If the client is retired or unemployed, toggle the switch: this will automatically lock "Years Employed" to `0`.
 3. Click Run Risk Prediction.
 4. Observe the results screen:
 - Status Badge: Displays Approved (Low risk) or Rejected (High default risk).
 - Confidence Score: The probability generated by the underlying model.
 - Risk Attributions: Visualizes which client properties supported approval or added risk.
-

3. Reviewing Prediction logs

To audit previous calculations:

1. Click History Log in the navbar.
2. View the tabular list of registered transactions, ordered by timestamp.
3. To export the database, click the Export Logs dropdown in the top right:

- Click Download CSV to download a spreadsheet.
- Click Download JSON to download a raw database dump.
