

Business Use Cases

1. Platform Actor Actions Matrix

The CreditGuard AI ecosystem supports three major personas with secure boundaries:

Role	Primary Actions	Permitted Telemetries
Administrator	Database migrations, view telemetry metrics, search logs, manage profiles	Full access
Loan Officer	Search history log ledger, check attributions, run predictions	Restricted access
Client User	Access multi-step onboarding wizard, check personal results	Personal access

2. Transaction Life-Cycle

1. Applicant completes the WForms wizard. 2. Flask routes sanitizes input data. 3. ML Model scores risk probability. 4. Database logs outcome, and explainability coefficients render on results screen.
