

Empathy Map

1. User Persona: Sk Md Shariff (Loan Officer)

Understanding user requirements is central to designing CreditGuard AI. The empathy map below details the persona of a risk appraisal officer:

2. Cognitive Mapping Matrix

Quadrant	User Behavior & Thoughts
SAYS	'I need a quick way to inspect prediction statistics and verify model accuracy indicators.'
THINKS	Will an automated AI tool miss critical edge cases? Can I trust the explainability outputs?
DOES	Reviews credit reports, checks debt-to-income limits, prints certificates for audits.
FEELS	Overworked by manual audits; wants a clean dashboard with active telemetry metrics.

3. Pain Points & Expected Gains

- Pain: Inability to explain reject decisions to customers due to legacy models.
- Gain: Seamless printable credit evaluation report featuring QR validation.
