

Solution Requirements

1. Functional Requirements

- Secured Sign-in: User accounts persist using database sessions.
- Risk Assessment: Score socio-demographic inputs instantly.
- Attributions: Calculate local coefficients for low/high risk factors.
- Telemetry Graphs: Plotted using Chart.js on the admin console.

2. Non-Functional Requirements

- Performance: Return scoring responses in under 20ms.
- Security: Store password credentials strictly as bcrypt hashes.
- Stateless: Session management must remain compatible with Vercel's read-only filesystem.
